Professional Summary

Semiconductor Equipment Technician at Micron Technology with hands-on experience in wire bonding and backend packaging in high-volume manufacturing environments.

Skilled in K&S wire bonders, PRS calibration, loop optimization, and defect analysis including NSOP, wire sweep, and bond failures. Experienced in preventive maintenance and basic troubleshooting of semiconductor equipment.

Seeking to contribute to advanced semiconductor manufacturing environments such as Broadcom in equipment or process roles.

Key Skills

- **Semiconductor Processing:** Wire Bonding, Backend Packaging, Yield Improvement, Defect Analysis
- **Equipment Handling:** K&S Wire Bonders, Machine Setup, Preventive Maintenance (PM), Troubleshooting
- **Process Knowledge:** PRS Calibration, Loop Optimization, Bond Parameter Tuning
- **Defect Knowledge:** NSOP, Wire Sweep, Loop Instability, Bond Lifting
- **Tools:** JMP, MS Excel
- **Core Knowledge:** Semiconductor Devices, VLSI Basics, Communication Systems
- **Soft Skills:** Problem-Solving, Adaptability, Communication, Teamwork

Experience

Micron Technology — Semiconductor Equipment Technician

2025 – Present

- Operated K&S (Kulicke & Soffa) wire bonding machines in high-volume semiconductor production
- Executed machine setup, wire threading, and production buy-off operations
- Performed PRS calibration and optimized loop profiles to ensure bonding quality
- Diagnosed bonding defects such as NSOP, wire sweep, and loop inconsistencies
- Conducted preventive maintenance (PM) and supported equipment troubleshooting
- Coordinated with process engineers and vendor teams during machine setup and installation

Chegg India Pvt. Ltd. — Subject Matter Expert

Sep 2023 – Present

Solved advanced mathematical problems and supported students globally.

Technical Exposure

- Semiconductor Backend Packaging Process Flow
- Basic Understanding of Frontend Processes (Lithography, Etching, Deposition)
- Yield Improvement Concepts and Defect Reduction

Education

Madan Mohan Malaviya University of Technology, Gorakhpur

B.Tech in Electronics and Communication Engineering

CGPA: 8.48

2021 – 2025

Projects

AI-Based Interview Preparation Platform

Developed a full-stack application with secure authentication and interactive UI.

Portfolio Website

Created a responsive personal website.

Certifications

- NPTEL Certification in Internet of Things (IoT)
- Self-study: Semiconductor Manufacturing (Frontend & Backend Basics)

Achievements

- Hands-on experience in semiconductor manufacturing at Micron Technology
- Strong academic performance with CGPA 8.48

Interests

Cycling, Walking, Sports
